

03.07.2012

Management of “Dniproviskiy Pipe Works” LLC made a decision to build a new mill for shaped tubes with sizes 40*40 mm up to 100*100 mm, to increase production potential of our company.

Mill’s building was started in the begging of July 2012. Approximate date of running-in is January 2013.

This measure leads “Dniproviskiy Pipe Works” LLC to more competitive position on the market of shaped tubes in the segment.
