

Pavlograd Plant of Technological Equipment (JSC "PZTO) manufactures optional equipment for various industries.

Plant specializes in the manufacturing of:

1. drawing-gauging equipment (drawing-gauging units; cold-deforming rolling mills; short-mandrel drawing mills for the production of different types wire and reinforcement as well as for hot-rolling rounds gauging);
2. straightening and cutting equipment (units for rolled wire rewinding into the rolls and coils of define sizes or weight; units for remaking of multi-ends (off-grade) rolled wires to the qualified (butt-welded) rolled wires; units for rolled wire cutting on mensural rods);
3. tube welding equipment (mill for the manufacturing of longitudinal electrical welded tubes);
4. shaping equipment (mills for manufacturing of shaped tubes);
5. material mining equipment (reduction units for underground conveyors; arc-bending machines; magnetic separators; movable loading units; loading handlers);
6. gas cylinder equipment (equipment for sealing of gas cylinder bottoms and necks; sets for gas cylinder manufacturing);
7. general industry equipment (lead-and-feed screw lathe of high accuracy; tube chain conveyors);
8. equipment against special orders (own design bureau JSC "PZTO" products as well as against customer's designs).
